Hello Heather,

The following documents are attached for your review:

- An updated data matrix. The changes to the data matrix were outlined in my response letter I emailed you earlier.
- Study titled "Masse, A.M., (2018). Manipulator™ - Validation of the Analytical Method for the Determination of the Active Substance Chlormequat Chloride in Aqueous Solutions. Smithers Viscient Study No. 14105.6124. 68 pp." This study was assigned MIRD 50747517
- The Product Specification Form (PSF) that shows the formulation of Manipulator in Canada. This is to prove Manipulator and Adjust are the same end use products.

I look forward to your feedback.

Thank you,
Jessica

Hi Jessica:

We received the science screens from HED and EFED. HED did not identify any deficiencies during their initial screen; however EFED did. Please see the attached deficiency letter and confirm receipt via email.

Thank you,
Heather
